

Chapter 15: Next Steps

The adoption of this Comprehensive Plan is an early step in the planning process. The City of Lynchburg has a long history of planning and bringing those plans to reality. Chapter 4 of this Plan includes a detailed plan implementation program (PIP) that should be followed and updated annually to reflect changing conditions and priorities. The tasks in this PIP are not the only actions required to be pursued to implement the Plan, the policies in Chapter 3 provide operational guidance on a wide range of issues for departments throughout the City. This Plan will be most valuable if the City Council, Planning Commission and administration focus on the vision and goals as they prepare annual updates to the PIP through the budget process and the City's administration continuously follows and works with the community to refine the policies to improve delivery of the services that best meet the community's needs.
