**Addendum for Proposal**  
**Engineering Design Services for Burton Creek Interceptor Replacement**  
**14-878**

---

Date: November 14, 2013  
From: Stephanie Suter, CPPO, CPPB  
RE: Addendum No. 1

---

This Addendum supplements and amends the original Request for Proposal and shall be taken into account in preparing proposals.

1. Page 3, under Scope of Services, Task 1, Item 2 – According to DPOR, non-certified (VGIN) aerial mapping cannot be used for design purposes. Are the City's new VGIN maps certified and available for use for design of this Burton Creek Interceptor Project?

**The City has VGIN orthophotography from 2011 that can be provided for this project, as well as 2' contours from the same year also from VGIN. The contours are available for download from the GIS data download website. The orthophotography will need to be requested by the selected firm from the GIS office. The City's mapping shall be used for planning purposes only, and field verification will be needed during the design phase.**

2. Page 5, under Proposal Preparation – does the 20-page limit mean 20 sheets or 20 pages (i.e., can we print front-and-back on 20 sheets of paper)?

**A limit of 20 pages of narrative has been set for this proposal. If submittals are printed double sided, this means 10 pieces of paper are allowed.**
