Body Worn Cameras

The City of Lynchburg intends to award the purchase of body worn cameras to TASER International, Inc., a Delaware corporation having its principal place of business at 17800 N 85th Street, Scottsdale, Arizona, 85255. The Lynchburg Police Department received a grant from the Department of Justice for funds to begin deploying a body worn camera program to outfit each of the 174 sworn officers assigned to the department. The initial purchase will be for 175 body cameras and all accessories, warranty, licenses and storage in the amount of \$288,428.65. The LPD conducted thorough research and performed an extensive field demonstration of several manufacturers. It was determined that TASER was the only manufacturer to offer components critical to the successful implementation of the body worn camera program for the LPD. These functions unique to TASER include 12 hour continuous record, flexible mounting options with two interchangeable camera systems, signal technology for CEW, and automatic RMS/CAD integration with Evidence.com data.
