TO: Public

SUBJECT: Coronavirus Security Measures

The Lynchburg Regional Airport (LYH) remains highly committed to the health and safety of passengers, guests and employees. There are growing concerns about the spread of the coronavirus, and in an effort to keep you and your family healthy and prevent the spread of germs, we are sharing some important information.

LYH currently has multiple alcohol-based battery operated automatic hand sanitizing machines strategically placed through the sterile and non-sterile areas of the passenger terminal. We have posted the CDC “Wash hands frequently” signs in the public restrooms and employee break rooms. In addition to both of these items, our Custodial team has increased the frequency of restroom cleaning. We regularly clean our restrooms after each arriving flight and will now make a pass through the restroom during a flight being processed. All seating areas, concession eating area, water fountain, and other touch surfaces are also being wiped down with a disinfectant more regularly throughout the day as well.

Hand washing remains the most effective method of preventing the spread of germs, including coronavirus. Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, and after blowing your nose, coughing or sneezing.

Additional everyday preventive actions to help prevent the spread of respiratory diseases like coronavirus, include:

- *Avoid close contact with people who are sick.
- *Avoid touching your eyes, nose, and mouth.
- *Stay home when you are sick until you’ve been free of fever for 24 hours.
- *Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- *Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.

Additionally, we encourage everyone to regularly check the [CDC’s website](#) for important updates and safety information.
