
Artist's Renderings

Two Artist's Renderings Follow This Page

The first rendering is a aerial view of the Tyreeanna/Pleasant Valley Neighborhood looking from the James River back towards the proposed Village Center.

The second rendering is also an aerial view showing the proposed Village Center in greater detail.

These two renderings illustrate what the neighborhood might look like and what the road network might be once new development takes place. These renderings reflect the ideas stated in the text of the plan; the actual appearance of the neighborhood 20 years from now will depend on what development actually occurs and where it is located.
